

Vari-Green Constant Pressure Control, Remote Transducer with Duct Probe, Product # 872986

The Constant Pressure Control can be used to monitor static pressure in a system, automatically adjusting the fan speed to maintain a desired static pressure. This control reduces energy consumption not only by reducing the speed and the energy used by the fan, but will also reduce the amount of conditioned air that is exhausted. Recommended for use in multi-family structures, hotels and schools where demand control ventilation applications exist.

- 2-line, backlit display
- Dedicated airflow control mode
- NEMA-4 enclosure on all components
- Pressure range of +/- 1.0 inch wg
- Remote pressure transducer provides installation flexibility
- Intended for use with Greenheck's Vari-Green motor and Vari-Green Drive

Certifications

Performance Characteristics

No Fan Curve Available.

Construction Features

Includes	(1) Duct static probe
Includes	Remote pressure transducer
Includes	Vari-Green pressure control
